

Instructions:

1. **Academic honesty:** Do not look at anyone else’s open book or quiz. Do not talk to anyone except Dr. Hardy.

2. **For family questions on this quiz:** you may not use any help from your book or keys. Below is an alphabetical list of families that you were responsible for learning. Spelling must be correct.
 - Alismataceae
 - Araceae
 - Lauraceae
 - Liliaceae
 - Magnoliaceae
 - Nymphaeaceae

3. **For genus questions:** you may use only your home-made keys or the ones we made together for the first two labs. There may be no family names, common names, or pictures on these keys. The final answer is the correct scientific name for the genus.

4. **For key-out-to-species questions:** you may only use your book. You should start from the Master Key on p 9. You may not share books. You may record your couplet path if you wish (e.g. A2, C1, D2....) but this is not necessary. The final complete answer is the binomial for the species.

1. Key Out to Species Using Your Rhoads & Block (2.5 pts):

2. Family (0.5 pt):

3. Genus (0.5 pt):

4. Genus (0.5 pt):

5. Genus (0.5 pt):

6. Genus (0.5 pt):

7. Genus (0.5 pt):

8. Genus (0.5 pt): Emergent aquatic

9. Genus (0.5 pt): Emergent aquatic

10. Genus (0.5 pt):
