

- Hawaii, California, Bering Strait
- Bounty-hunting
- Pandora's Box
- *Artocarpus altilis* (Moraceae)
- Molecular systematics

William Bligh

-James Cook's sailing master  
(3<sup>rd</sup> Voyage; 1776)

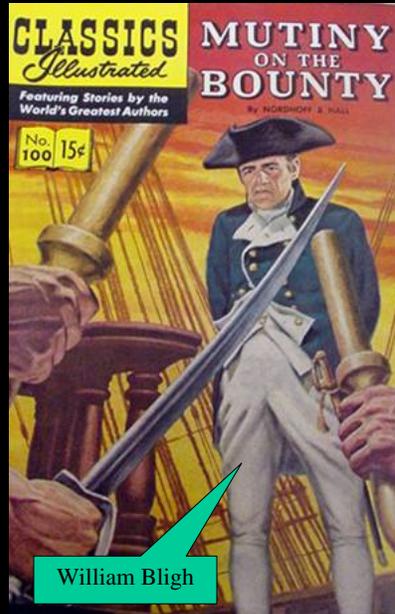

-Captain, HMS *Bounty*  
(1787-1789)

## The Mutiny on the *HMS Bounty*, 1789

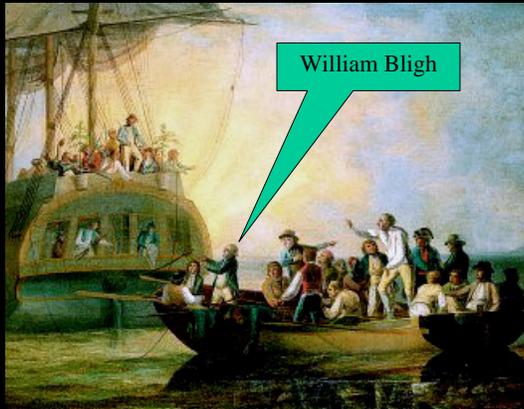

Portrait by Allan Ramsay, 1762

George III

William Bligh

## The Mutiny on the *Bounty*, 1789

William Bligh

-Bligh setting out (ultimately) for Timor and the Malay Archipelago. (3618 nautical mile; 6701 km)

## The Mutiny on the *Bounty*, 1789

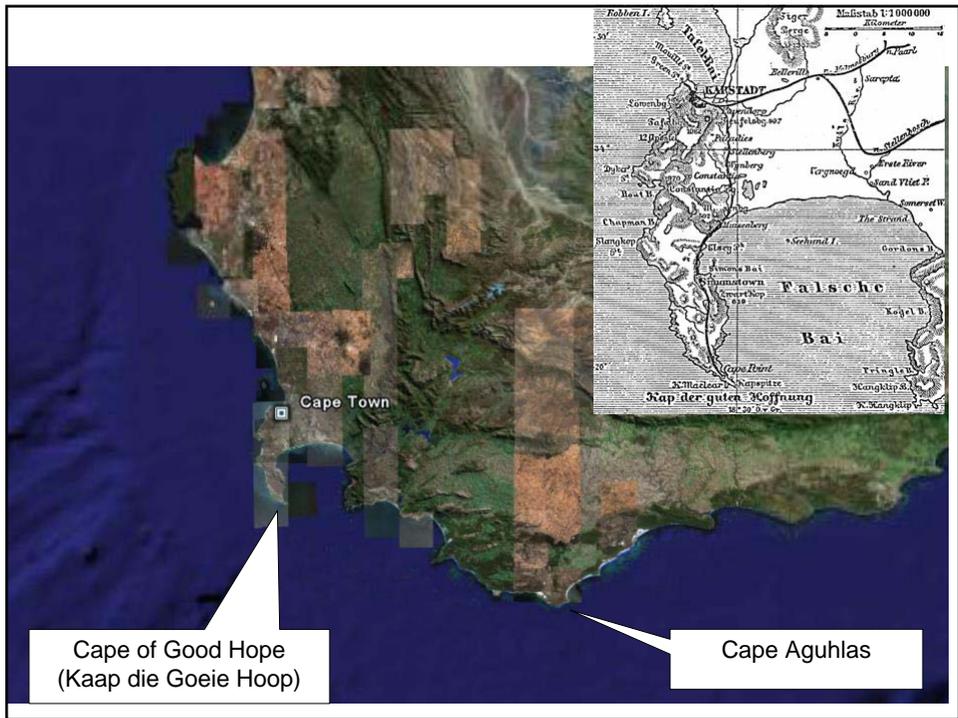

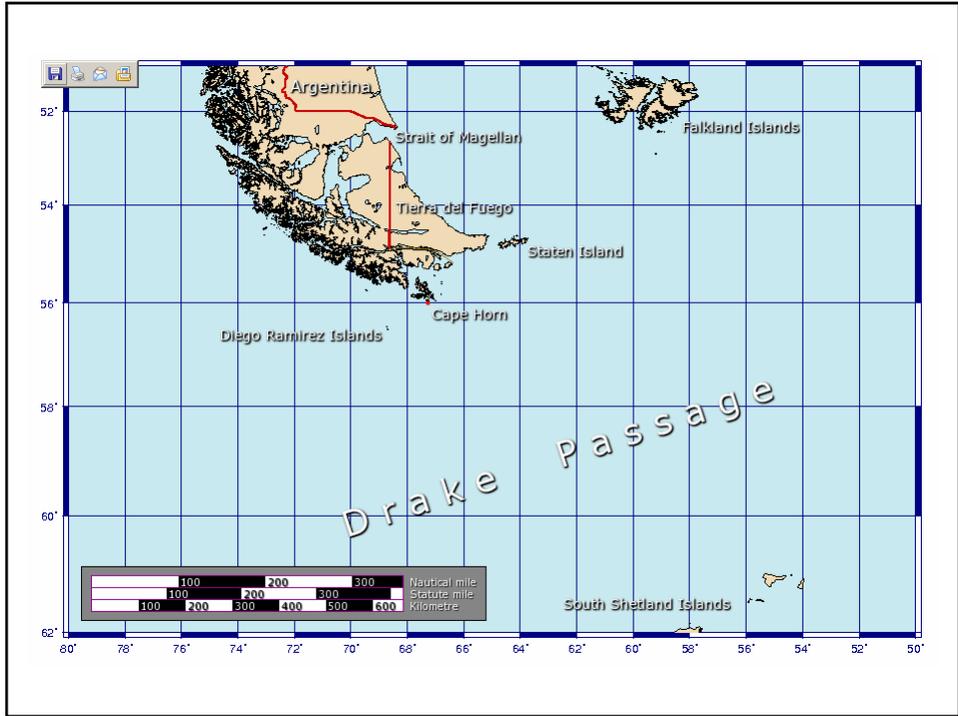

## The voyage of the HMS *Bounty*, 1777-1789

-23 Dec 1787, departed for Tahiti

Mission: To collect **breadfruit** for West Indies.

## The voyage of the HMS Bounty, 1777-1789

-23 Dec 1787, departed for Tahiti

Mission: To collect **breadfruit** for West Indies.

-28 Oct 1788, reached Tahiti

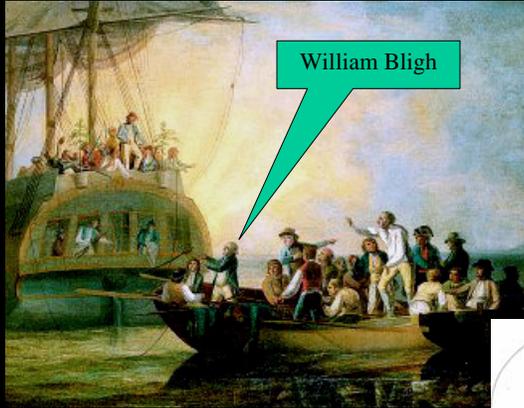

5 mos. Collecting & preparing 1000+ breadfruit trees.

-4 Apr 1789; set sail for West Indies

-29 Apr 1789, **mutiny.**

Led by first mate Fletcher Christian

## After the mutiny, 1789

-Bligh setting out (ultimately) for Timor and the Malay Archipelago. (3618 nautical mile; 6701 km)

## After the mutiny, 1789

Pandora by John William Waterhouse, 1896

### HMS Pandora

-14 mutineers caught, held in "Pandora's Box"

-Return: Great Barrier Reef, 4 prisoners and 31 crew lost.

## The voyage of the HMS Bounty, 1777-1789

Why the mutiny?

## Introduction to the genus *Artocarpus* (Moraceae)

Champedak *A. integer*

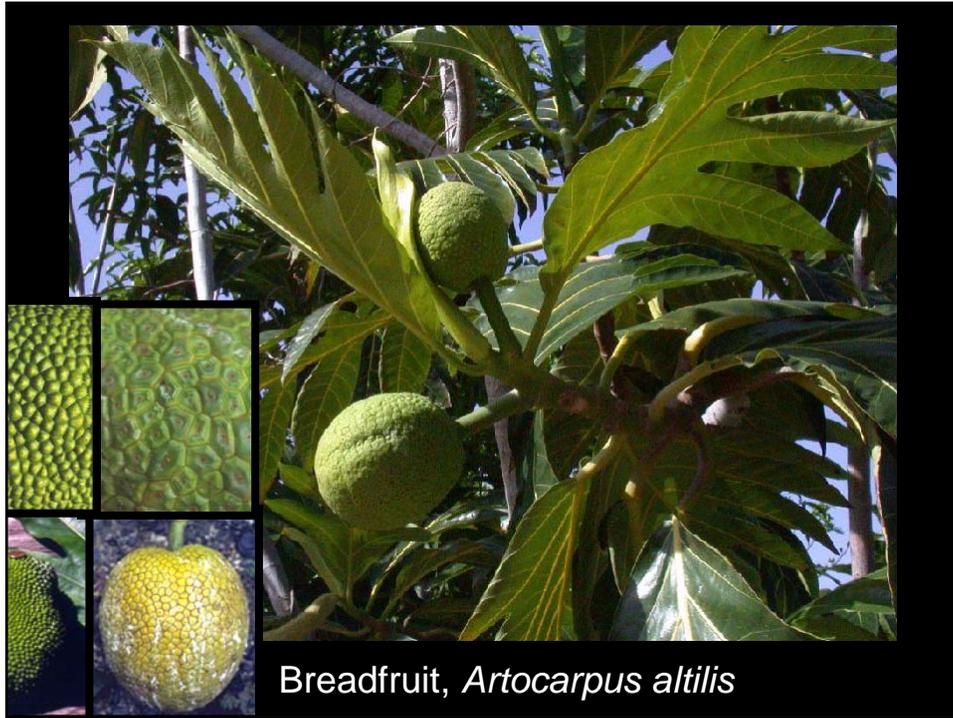

*A. odoratissimus*

*Artocarpus heterophyllus*  
Moraceae  
© G. D. Carr

Jackfruit, *A. heterophyllus*

Breadfruit, *Artocarpus altilis*

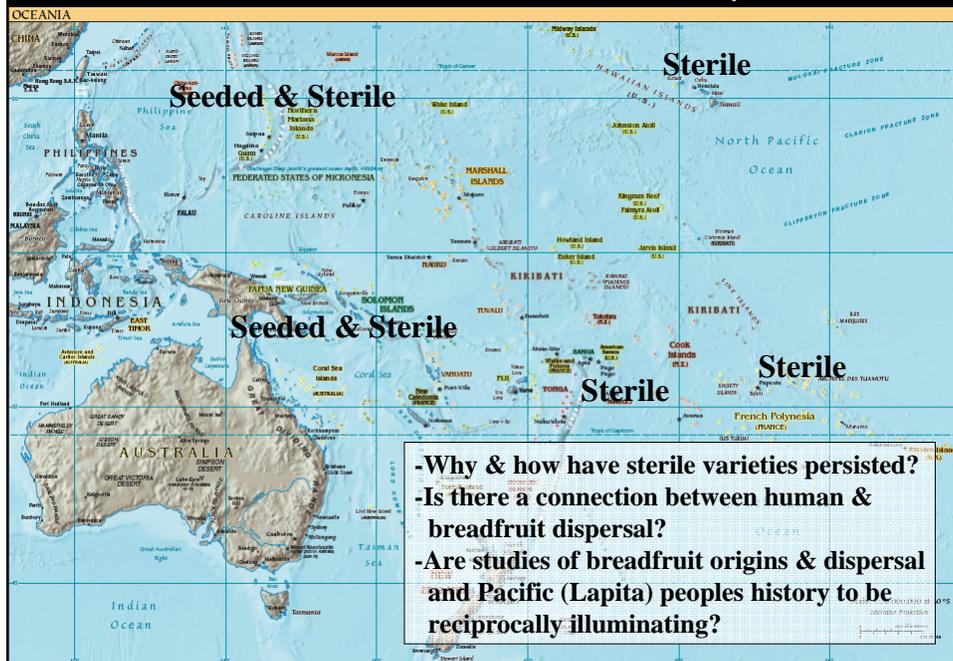

Breadfruit, *Artocarpus altilis*

- Starch staple of Pacific islands, 1000s yrs.
- Sterile throughout much of range in Oceania. Classic example of species (crop plant) that evolved & spread with humans.

## Breadfruit, *Artocarpus altilis*

## Breadfruit, *Artocarpus altilis*

## Where did breadfruit come from? (Who are its closest relatives)

These are questions asked by systematists.

Nyree Zerega

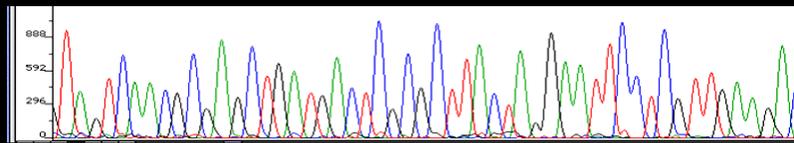

Zerega, NJC. 2003. The breadfruit trail. *Natural History* 112(10): 46-51.

Zerega, NJC, D Ragone, TJ Motley. 2004. Complex origins of breadfruit

(*Artocarpus altilis*, Moraceae): Implications for human migrations

in Oceania. *American Journal of Botany* 91(5): 760-766.

## Sources of phylogenetic (cladistic) data

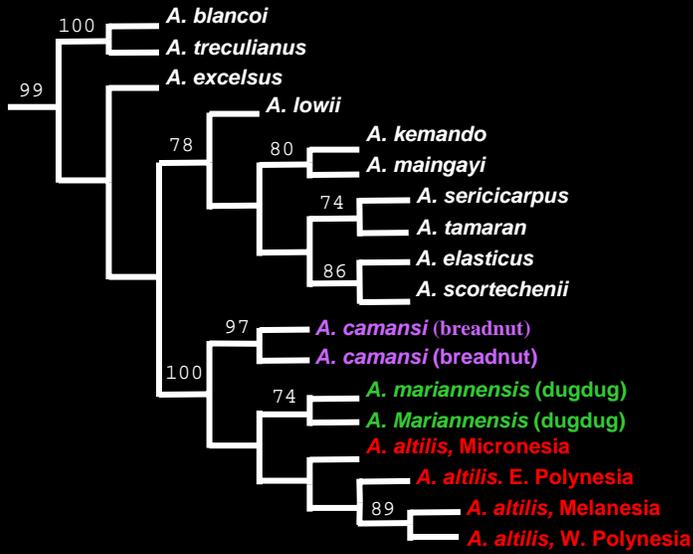

Nuclear region: ITS

Plastid region: *trnL-F*

Portion of most parsimonious cladogram

Breadfruit's closest relatives

*A. mariannensis*  
(dugdug)

*A. attilis*, breadfruit

*A. camansi*  
(breadnut)

## Infructescence shape and texture variation

*A. mariannensis*

*A. altilis*, breadfruit

*A. camansi*

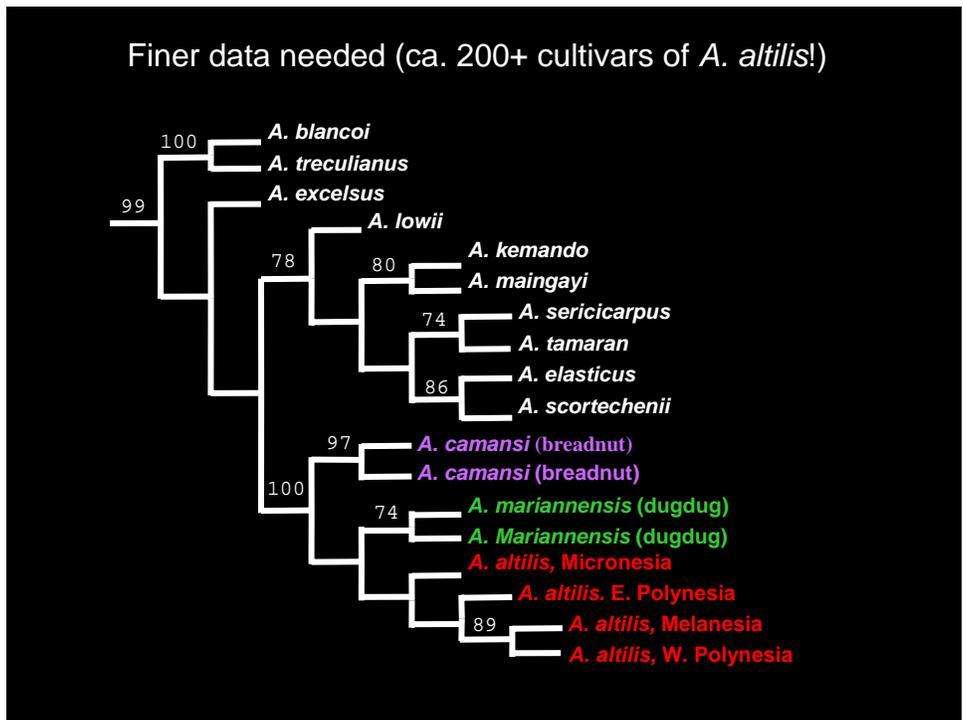

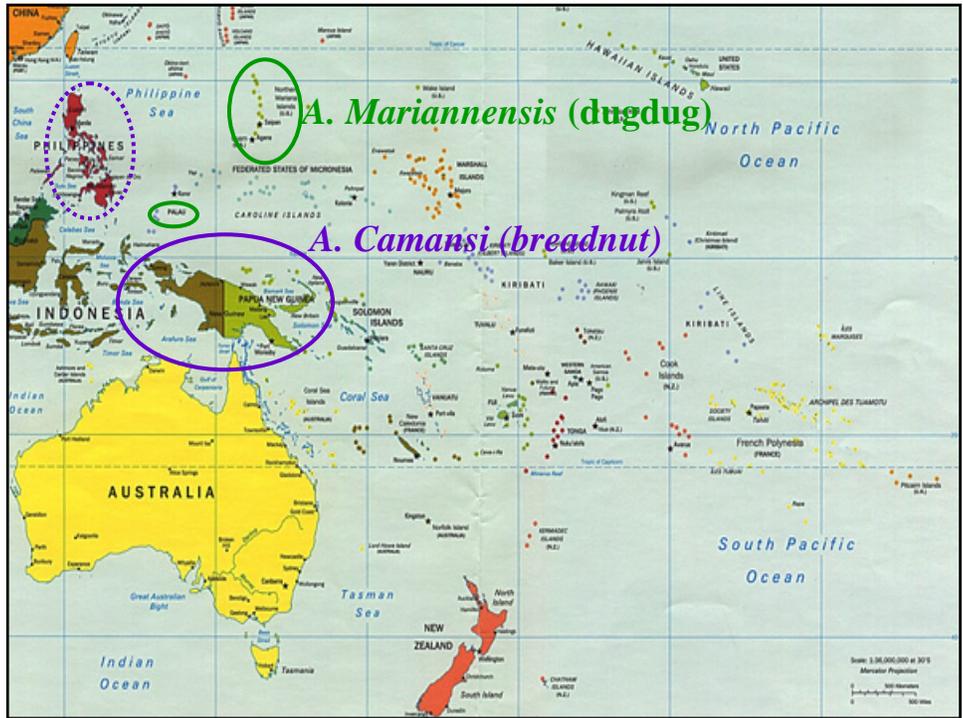

## Leaf variation

*A. mariannensis*

*A. altilis*, breadfruit

*A. camansi*

# Amplified Fragment Length Polymorphisms (AFLPs)

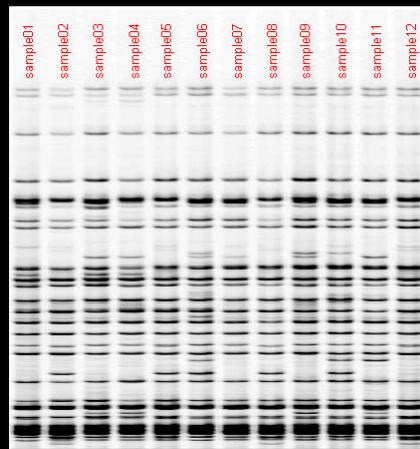

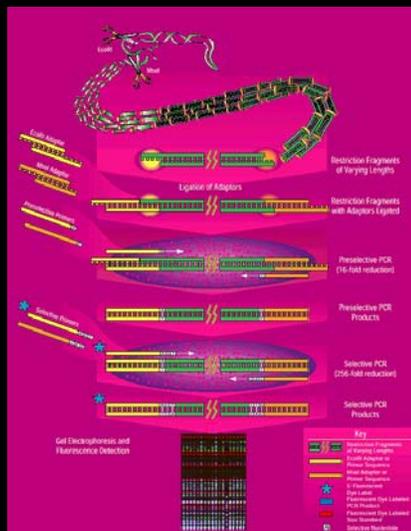

(DNA fingerprinting)

## Isozymes / Allozymes Analysis

(protein profiling)

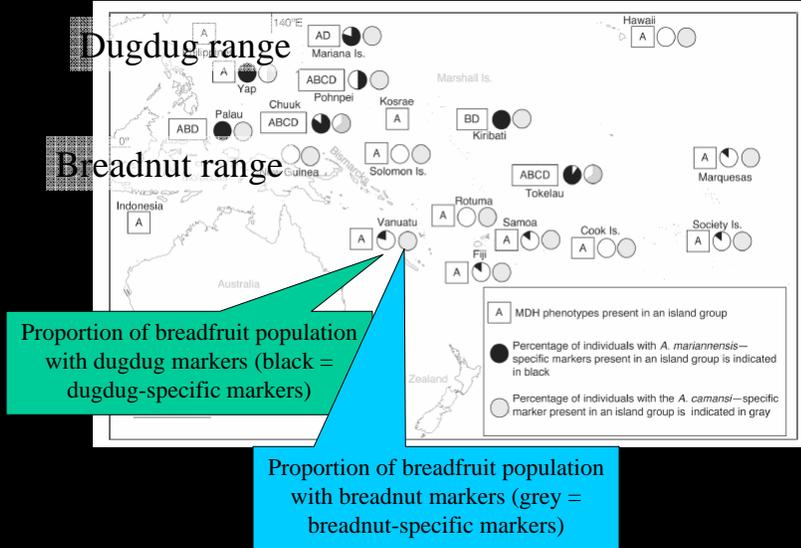

# Amplified Fragment Length Polymorphisms (AFLPs)

(DNA fingerprinting)

Much of breadfruit is breadnut, some islands (esp. Micronesia) with dugdug too.

Diane Ragone (NTBG), N. Zerega

Much of breadfruit is breadnut, some islands with dugdug too.
